

Project Title: Halal Keeps

Overview: Halal Keeps is a digital platform designed to strengthen the halal industry by improving claim verification, promoting halal businesses, and offering halal or non-pork establishments to the community. It connects users to verified halal businesses through a centralized marketplace, where they can view the location and halal status of food establishments. This can help business owners boost their income while ensuring the quality of meals offered. The initiative aligns with SDG 8: Decent Work and Economic Growth, and SDG 12: Responsible Consumption and Production.

Problem Statement:

1. Lack of reliable verification mechanisms for Halal claims made by non-certified businesses.
2. Limited visibility of halal market potential among local food businesses.
3. Limited awareness of Halal certification among non-Muslim communities in areas with low Muslim populations.

Objectives:

1. Increase verification mechanisms for Halal claims by 60%
2. Increase visibility of Halal market potential to at least 20% among local food businesses
3. Increase consumer demand for Halal-verified establishments among non-Muslim consumers to at least 15% within the next 12 months

Target Users / Personas

1. Muslim students
2. Muslim Workers
3. Food establishment owner
4. Halal Certifying Bodies
